Education

- **Chandigarh University**, Mohali, Punjab
Bachelors of Engineering (CSE) CGPA: 7.94 2022 - 2026
- **Tika Ram Model School**
Intermediate - 79% 2021 - 2022

Projects

Lively votes – Real time voting Application (Jan 2026 – Present)

- **Developed** a full-stack real-time polling application enabling users to create polls, cast votes, and view live results using **React**, **Material-UI (MUI)**, **React Router**, **Express**, **Socket.IO**, **Supabase**, and **Drizzle ORM**
- **Implemented** secure authentication flows with **Supabase Auth**, including email/password sign-up/login, automatic **refresh tokens**, password reset, forgot password recovery, and protected routes for authenticated user actions
- **Leveraged TanStack Query** to power **optimistic updates** for real-time vote actions (with rollback on failure and server validation) and **infinite queries** for seamless, performant pagination of polls and user voting history across devices
- **Tech Stack:** React, Node.js/Express, Drizzle ORM, Supabase, Material UI, Tanstack query, Socket.io

The Wild Oasis – Hotel Management Web App (Feb 2025 – April 2025)

- **Developed** a full-featured hotel management system to efficiently handle bookings, guest profiles, and cabin inventory using **React** and **Supabase**
- **Architected** a scalable, modular application structure with reusable **React** components and **React Router** for seamless navigation and maintainable code organization
- **Optimized** application performance and data management by implementing **React Query** for efficient server-state handling, caching, and real-time synchronization with **Supabase**
- **Tech Stack:** React, React Router, Tanstack Query, Supabase, Styled Components

MovieSite – Movie Review and Search Platform (Jul 2024 – Jan 2025)

- **Engineered** an end-to-end full-stack movie review application featuring IMDB-powered search, user-generated reviews, ratings, and personalized watchlists using Node.js/Express backend and Pug templating
- **Consumed** and processed external movie APIs efficiently, handling asynchronous data fetching, pagination, search filtering, and graceful degradation for optimal performance and reliability
- **Implemented** secure user authentication and authorization using **JWT** tokens, including registration, login, protected routes.
- **Tech Stack:** Node.js, Express, MongoDB, Pug, CSS, JWT, Axios

Skills

Languages:	Java, JavaScript
Frontend Development:	HTML, CSS, React.js, Tailwind CSS, Axios, Pug
Backend Development:	Node.js, Express, Mongoose, Rest APIs, JWT, Supabase
Databases:	SQL Server, MongoDB
Version Control:	Git, GitHub
CS Fundamentals:	Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, OOP
Interpersonal Skills:	Decision Making, Problem Solving, Team Management

Achievements and Certifications

- **Cloud Computing** (Top 1%) - NPTEL 2024
- **JavaScript** - The Complete JavaScript Course 2025
- **Node.js** - Node.js, Express, MongoDB & More: The Complete Bootcamp
- Solved more than **1000** questions across various platforms.
